

Track One, Plenary One & Two: Fire Activity Tracking

Conclusions

- Plenary 1: Use the following to help determine the required data elements
 - Scale
 - Application
 - Secondary Organic Aerosols
 - Group needs to be assembled (RPO's, Private, Federal, etc.) to create a protocol for required data elements of future tracking/reporting systems

Conclusions

- Plenary 2 – Discussing the Data Quality Objectives Matrix for Regional Haze
 - Wildfires (all ownerships)
 - Less than 100 acres, need county ID and acres burned (not mandatory for 2002 but desired)
 - Greater than 100 acres, must have specific location (all RPOs, 2002)
 - Type I IMT incidents need fire centroid or actual perimeter burned, in lieu of 1,000 acres

Conclusions

- Prescribed Fire: Whatever data is available with location and date
- Agricultural Fire: Same as prescribed
