

# Status Report Representative Community EI & Alaska Aviation EI

Presented by: Alice Edwards  
WRAP Emission Forum Meeting  
July 14, 2004

# Representative Community EI Project

# Representative Community EI Project Background

- Project goal is to develop emission estimates for rural areas of Alaska
- Develop inventories for 10-15 communities
- Use that data to expand to broader geographic areas

# Representative Community EI Project Status

- Sierra Research/ANCET selected as contractor team
- Community selection and survey development underway
- Coordinating with new WRAP Alaska Tribal Coordinator
  - Meeting July 29-30

# Representative Community EI Project Status

- Want to collect both summer and fall/winter activity estimates
- Emission calculations will be made this fall/winter
- Individual community results will be communicated locally
- Project to be completed by March 2005

# Alaska Aviation EI Project

ALASKA

# Alaska Aviation Inventory Background

- Travel by air is common in Alaska.
- Currently no comprehensive emission inventory for aircraft.
- Project will develop emission estimates statewide for aviation activities at airports and air strips in Alaska.

# Alaska Aviation Inventory Status

- Emission Forum Team established to develop RFP and review proposals:
  - Alice Edwards
  - Lori Campbell
  - James Carlin
- Scope of work has been prepared and sent to WGA/WRAP for inclusion in an RFP
- Hope to have contract in place by September
- Project to be completed by March 2005
