

Technical Support System Status Report

October 17-19, 2006

Spokane, WA

TSS Purpose

- **TSS developed & supported by Attribution of Haze WG**
 - **<http://www.wrapair.org/forums/aoh/index.html>**
- **Single portal to technical data & analytical results prepared by Forums & Workgroups**
- **Data, results, & methods displayed on the TSS are intended to support the air quality planning needs of western states and tribes**
 - **Primary purpose of the TSS is to provide key summary analytical results and methods documentation for the required technical elements of the Regional Haze Rule**
 - **Secondary purpose of the TSS is to be the one-stop shop for access, visualization, analysis, and retrieval of the technical data and regional analytical results**
 - **Finally, a major goal of the TSS is to make the standard and user-specified maps, charts, tables, and graphs easily available for export, while maintaining the original source data available for verification and subsequent analysis through the TSS**

Recent Births

TSS birthday – October ?, 2006
