

WRAP Joint Forums (Fire, Emissions, Dust and Modeling) Meeting Agenda
Wednesday, March 19, 2003, 1 to 5 PM
El Dorado Hotel, Santa Fe

- 1:00 Welcome & Agenda Review Tom Moore
- 1:10 **What have we learned, process and quality-wise, from processing the various 309 EIs with SMOKE, and then modeling visibility with CMAQ?** Gail Tonnesen, RMC
- 1:45 Question & answer / open discussion session
- 2:45 Break
- 3:00 **How do we want to approach the 2002 base year inventories?**
- Discussion Topics
- Emission Data System Needs Assessment
 - Dust Expert Panel and WESTAR results
 - What are the intended uses of the 2002 inventories' data?
 - Understand what time, space, chemistry characteristics, et cetera need to be addressed in building the inventories
 - What will happen to these 2002 emission inventories as the RMC uses these EI data with upgraded SMOKE and CMAQ capabilities?
 - How will QA/QC of inventories be addressed?
 - Should we set standards for acquiring and/or using inventory data?
 - When does the EI work "really" need to be done?
-
- Next steps for individual Forums
 - When do we need to meet
- 5:00 Adjourn for the day
